

## What are QR Codes?

Quick Response Codes™ are two-dimensional bar codes. They can store more information than a traditional bar code and can be read faster by a scanning device.

## Why are QR codes important for faster payments?

- Full-scale adoption of a faster payment capability will require a way to reach "the last mile" of transacting the millions of smaller sellers at their online and offline POS.
- QR Codes scanned with a mobile phone can quickly and easily initiate faster payments.
- No extra equipment, training or costs need be incurred.
- Rapid adoption is possible as witnessed in China and other countries.

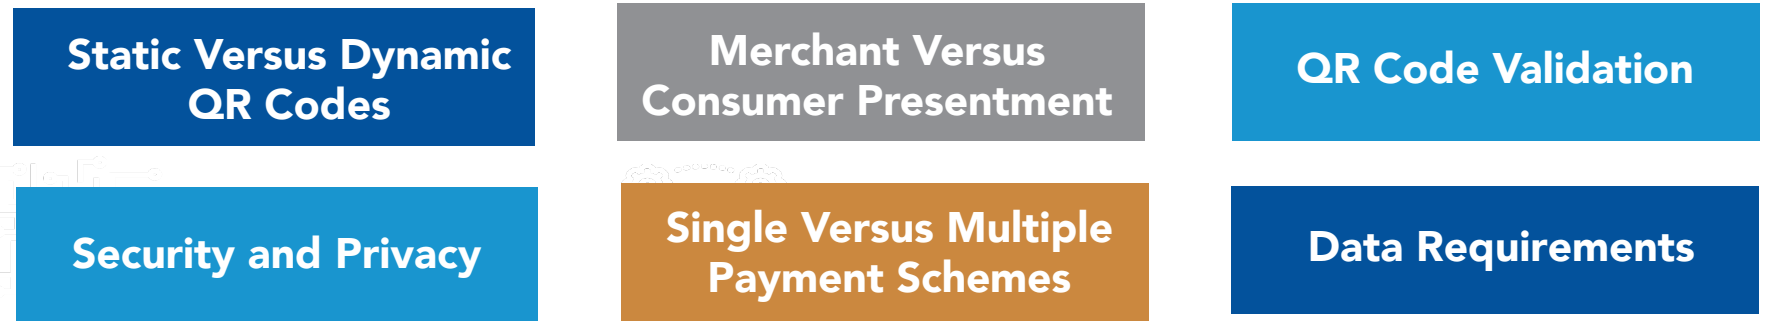

## Ideally QR codes reflect the following characteristics:

- Support both QR Code presentation modes
- Consistent and simple consumer experience
- Leverage existing infrastructure for ease of implementation
- Standardize certification for all major devices and operating systems
- Ensure robust security controls
- Support value-added services such as merchant offers, coupons, etc.

Two modes of QR Code presentation are unfolding:

### Consumer Presented

### Merchant Presented

### About the U.S. Faster Payments Council (FPC)

The FPC is an industry-led membership organization whose vision is a world-class payment system where Americans can safely and securely pay anyone, anywhere, at any time and with near-immediate funds availability. By design, the FPC encourages a diverse range of perspectives and is open to all stakeholders in the U.S. payment system. Guided by principles of fairness, inclusiveness, flexibility, and transparency, the FPC uses collaborative, problem-solving approaches to resolve the issues that are inhibiting broad faster payments adoption in this country. For more information, please visit [FasterPaymentsCouncil.org](http://FasterPaymentsCouncil.org).

### About the FPC's QR Code Work Group

The QR Code Work Group explored the use of QR codes to aid in the adoption of faster payments in the United States and focuses on the use of QR codes to facilitate consumer purchases using bank accounts.
